

Version 1.26

Repairs

I-140: Corrected problem with Part 4. Question 1

I-485: Corrected problem with new questions

G-28: Made change to the Part 1 B section of the G-28 requested by one of our California clients. When the form is being filed for an employer petitioner, the I-129 signer information in the Employer record will be loaded in the name fields. The signer title information will also be loaded from the Employer record. In the address block, the company name and street address information will be loaded. If a Client No is entered, the data will load as before.

Records that already have petitioner data in the G-28 data entry window will have to be cycled through a different EMP or Client No and back again in order for the data to appear in the new format.

When the G-28 goes to PDF, the signer's title will appear at the right end of the signature line.

I-130: Fix Save Operations. Activate addenda function for additional petitioners. Provide option not to display printed name in Part E signature block.

I-751: Repaired Children's Table and form display of address/Immigration Status data

Revised Forms

I-129F(Rev. 02/19/2010)Y

I-131 (Rev. 02/12/2010)Y

N-400(Rev. 04/05/2010)Y
